

HelioCampus Assessment is a unified platform for managing institutional assessment and accreditation, planning for continuous improvement, and connecting authentic lifelong learning to help improve learner success. Our platform enables easy automation of evaluation, supports individual student assessment, facilitates curriculum mapping and review, streamlines campus-wide accreditation processes, and helps to achieve strategic and educational goals. While we operate as a distinct business unit, we are able to leverage the breadth and depth of expertise across the broader HelioCampus portfolio of technologies and services to help meet the expanding and unique needs of our partner institutions.

In early September 2021, HelioCampus, a comprehensive technology solution for decision-support and benchmarking, and AEFIS, an assessment management platform, joined forces

Digitizes curriculum, assessment and improvement processes to support your campus culture.

Integrates seamlessly with existing campus systems & methodologies.

Implements global standards to enable interoperability for easy transfer of data.

Automates existing assessment and accreditation processes, enabling multiple pathways to gather data on student learning outcomes assessment.

Enables learners to curate ePortfolios from their Comprehensive Learner Record (CLR) of skills and outcomes across multiple learning environments.

direct assessment data from student outcomes in courses and co-curricular activities to your curriculum maps.

to conduct an assessment on student learning outcomes for a unified view of student learning, skills acquisition, and career attainment.

within a unified assessment platform to digitize your current processes and enhance them for your community's contribution to your assessment efforts

and original work back to learners as portfolio items to help them articulate skills to their employers from the same data you're collecting for accreditation and improvement.

of annual assessment reporting and planning for continuous improvement and accreditation in collaboration with stakeholders.

to support Student Learning Outcomes (SLO), which includes the design and revision of curriculum, courses, and programs.

in and outside of the classroom with outcomes and skills frameworks for student access through Comprehensive Learner Record (CLR) and portfolios.

learning outcomes with institutional strategic planning goals.

across mission, vision, and institutional culture to campus-wide initiatives.

across campus systems through standards-based technology and interoperability.
