

**NOTE: Christy Goodright began AY2021-2022 as Chair of the RPD committee. Due to a position she accepted in her second year as Chair of the committee, she resigned as Chair of RPD in November 2021. Justin Ostrosky, then Vice Chair of RPD, immediately became interim chair of RPD. In a special election, Justin Ostrosky was elected Chair in December 2021 to serve out the remainder of Christy Goodright's term (ending in June 2022) and resigned from his position as a SOBL representative and Vice Chair to the committee. Terilyn Battle was elected to replace him as a SOBL representative and Vice Chair to the committee.**

<p>Investigative Learning Projects 1&amp;2</p> <p>Investigative Learning Projects 1&amp;2 are designed to help students develop research skills and critical thinking abilities. These projects involve identifying a research question, gathering and analyzing data, and presenting findings in a clear and concise manner. Students are encouraged to explore a wide range of topics and to work on projects that are personally meaningful and relevant to their interests.</p> <p>Investigative Learning Projects 3-5</p> <p>Investigative Learning Projects 3-5 are designed to help students develop advanced research skills and critical thinking abilities. These projects involve identifying a research question, gathering and analyzing data, and presenting findings in a clear and concise manner. Students are encouraged to explore a wide range of topics and to work on projects that are personally meaningful and relevant to their interests.</p>					
Bonnar	Matthew	NAMS	Biology	Once Upon a Time	

Fan	Weihong	NAMS	Environmental	Mapping New Jersey Excess	
<p>The map displays various regions of New Jersey, with different colors representing different levels of excess. A legend in the top right corner identifies the colors: red for 'High Excess', orange for 'Medium Excess', and green for 'Low Excess'. A scale bar at the bottom indicates distances in miles, ranging from 0 to 100. The map shows a significant concentration of high excess areas in the central and eastern parts of the state, particularly around the New York City metropolitan area and the Delaware River valley.</p>					

Jackson	Christina	SOBL	SOAN	Know Your Place: Black Leisure as an Expression of Freedom and Citizenship / Know Your Place analyzes how Black Americans participated together in leisure spaces. This exhibition is on display at the show.	Fall 22 / Spring

**AY 2022-2023 Main Round Applications (April 2022 Round of Review)**

My goal is to secure funds to produce a book chapter for my first major manuscript for publication. While the basic framework for this chapter is already drafted, adequate archival support for the argument is needed.

be in passage to the spirit of the times; black

Kingston, 1782-1823 protesting major questions in this chapter.

ARHU/Hist

For the last 30 years, the DNA probe has been used to identify specific DNA sequences that are associated with certain diseases. The probe is a short segment of DNA that is complementary to the target DNA sequence. The probe is used to identify the target DNA sequence by hybridizing the probe to the target DNA sequence. The hybridized probe is then detected by a variety of methods, including autoradiography, fluorescence, and colorimetry.
