course to students based on teaching practices and methods derived from empirical evidence, which is designed to improve learning outcomes for all students including students with disabilities and diverse student populations.

Course Materials: Informational resources used in a course to promote learning. Course materials include but are not limited to documents (syllabus, handouts, assignment guidelines), educational materials (textbooks, software), multimedia (videos, blogs), written information and other physical or electronic materials.

Course Design: The systematic manner, based on appropriate best practices, a course (or other learning experience including but not limited to service learning, internships, independent studies) is delivered.
