

You state that there are no anticipated resource needs beyond the coordinator but never justify this. This is the only BSHS track that requires CHEM IV or biochemistry, which would suggest that there could be an impact on ability to meet demand in those courses at the very least. You should provide a letter of confirmation from CHEM and BIOL chairs that they anticipate no problems meeting demand.

Indeed! Students in this concentration will require courses that BSHS students in

Mercer has a requirement within their MLT associates degree that students must earn a C within two attempts in all science courses. Will our students be able to move to the clinical portion of the degree if they take a science course a third time?

GENS would not oppose the use of these courses in ASD/GNM requirements. It is worth noting, these kinds of exceptions have been made before. For example, the ethics course for the Nursing program is a general studies course (GSS 1053) because it does not fit with F1 12 Tf1-1 0 1 :
